Re: DA 12-1863, IB Docket No. 12-340, RM-11683
Reply Comments LightSquared's License Modification Application and Petition

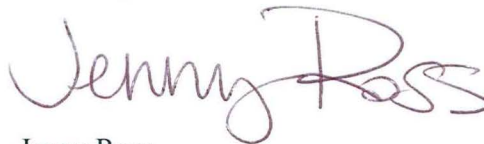

Dear Ms. Dortch:

I have been following LightSquared's ongoing efforts to build a new mobile broadband network, and I believe it would truly benefit businesses and individuals in rural states like mine. The network will not only encourage competition and innovation in the wireless industry, which results in cost savings and increased options for consumers, but it will also expand the country's broadband capacity, which will provide service in underserved rural communities. I agree with the overwhelming majority of comments submitted in these proceedings that LightSquared's proposal is in the public interest and that the FCC should initiate proceedings that will enable many economic and societal benefits to flow from the deployment of this nationwide wholesale-only mobile broadband network. It's the right thing to do for American consumers like me.

I work in the fast-paced healthcare industry, and as a mom, I wind up doing a lot of my work from home, or while on the road. It is imperative that I am able to keep in touch with my office, vendors, and clients no matter where I am, and of course, I always want to be accessible to my family when they need me.

Thank you for moving as quickly as possible with your review; I appreciate your time and consideration.

Sincerely,

Jenny Ross
